## **Esch Construction Supply Develops Grinding Shroud for Chamfer Application**

**ST. PAUL, MN** – Esch Construction Supply, Inc., a leader in providing solutions to contractors for over 30 years, announces the launch of the Edge Eater™ Chamfer System, a dust-free grinder shroud for concrete chamfer applications. Continued focus on labor savings in unique applications, and dust-free work environments has prompted Esch to develop this specialty chamfer shroud. The Edge Eater™ shroud is priced at \$289 and is designed exclusively for Metabo grinders.

### **Replace cup grinding in a unique application**

Use the Edge Eater™ Chamfer System for concrete chamfer grinding in both new construction and restoration applications, such as parking garage pillars, concrete pole bases and precast concrete. The Edge Eater™ contains an easily adjustable guide that varies from 3/4" to 1-3/4", creating an easy, time-saving chamfer and a quality, uniform finish. Additional time-saving benefits include 1 diamond wheel for both chamfer and flat applications, and quick, tool-free shroud change.

### **Developed exclusively for Metabo grinders**

The complete Edge Eater™ Chamfer System is encouraged to maintain OSHA objective-data compliance. The system contains: the Edge Eater™ chamfer shroud, Esch Cut and Grind diamond wheel, Metabo W-series grinder and Pulse-Bac 550 vacuum. The Metabo GED grinding shroud is a compatible option for flat surface smoothing and flush cutting when necessary.

### **About Chamfering Concrete**

Chamfer is an edge beveled at a 45° degree angle. Chamfered edges are used to prevent chipping and damage to green concrete as well as mask imperfections or damage on cured concrete. Eliminating sharp corners also minimizes potential damage to other objects. Use the Edge Eater™ after form removal to clean up an existing chamfer or create a new 45° degree chamfer on a concrete edge.

Find out more about the Edge Eater™ at [www.EschSupply.com/edge](http://www.EschSupply.com/edge) and see it in action at [www.EschSupply.com/edgevideo](http://www.EschSupply.com/edgevideo). Air sampling documentation is available at [www.EschSupply.com/edge-dust-free](http://www.EschSupply.com/edge-dust-free).

### **About Esch**

Esch continues to build partnerships with contractors and manufacturers in the construction industry by providing exceptional service and customized solutions. Specializing in diamond tools, cutting equipment, parts and repair, Esch has a commitment to find a way. To discover the Esch difference, visit [www.EschSupply.com](http://www.EschSupply.com).

The Edge Eater™ Chamfer System is property of Esch Construction Supply, Inc. Patent Pending.
